INFORMATION REPORT

This material contains information affecting the National Defense of the United States within the meaning of the Espiconage Laws, Title 18, U.S.C. Secs. 793 and 794, the transmission or revelation of which in any manner to an unauthorised person is prohibited by law.

SECRET/U.S. OFFICIALS ONLY

Observations at the Aircraft Factories at Vodochody and Cakovice-Letnary NO. OF PAGES THE SOURCE EVALUATIONS IN THIS REPORT ARE DEFINITIVE. THE APPRAISAL OF CONTENT IS TENTATIVE. (FOR REY SEE REVERSE) Airfield and Rudy Letov Aircraft Factory at Vodochody 1. The production of MIG-15's at the Rudy Letov factory in Vodochody is continuous but the number of departures does not seem to have regained the rate of late summer 1953 when 50 to 60 planes in front of hangars were a common sight. The number of planes noticed now is much more modest. Twelve planes were seen in front of the hangars; nine of these were covered up, while three were not showi Gzechoelovak markings; another plane was on the field with a work crew around if finally, a last plane was behind the hangars. Inside the hangar, through an opdocr, other planes could be observed

 Construction work is still in progress in the enclosure of the factory, but it seems that for the moment it only goes on in small annexes or in the administra tive buildings. In particular, there is one square building, distinctly taller than the others, under construction, but its purpose cannot yet be determined.
3. A truck transporting some aluminum or duraluminum parts was seen enroute toward the factory.
Cakovice-Letnany Aircraft Factory Complex
4. No plane of the II-10 type has been noticed in front of the Avia factory at Letnany (Cakovice). On the other hand, the number of planes of this type stored in front of the hangar of the Aero factory at Letnany has grown consider While no exact count was made, an estimate of 125 planes is not exaggerated. A far as can be judged, these planes bear no squadron registration number. They appear thus to be planes either still being tested or else already tested but yet assigned to formations.
